Introduced a straightforward website with search engine optimization and all the necessities for a professional online presence.

Grafton, VT

2007 – Present

CLIENT TESTIMONIALS

- "Chris Gabriel is a skilled and creative web developer and graphic artist. He was able to take my broad ideas for my website and turn it into a multi-layered web portal within a few days. Chris did more than build on the framework he was given; he took my outline, completed it and suggested additional options which I can build on in the future. He also executed an original graphic design throughout the website that captures the atmosphere I want to project for my business. Chris is responsive, talented and cost-conscious - attributes that every business can use. His work has had a greater impact on my business than I could have predicted and I recommend him highly." – *Donna C.*
- "Chris is a real pleasure to work with. He is a talented designer with rock-solid communication skills and a positive attitude that makes him excel at customer service. My requests are always answered promptly and efficiently with no hassle whatsoever!" – *Jenn W.*
